FUEL TANK IGNITION MITIGATION MEANS

Costs Significantly Less Than OEM Nitrogen Inerting Systems.

- Comes as a complete prefabricated kit; after installation, the system is virtually maintenance-free.
- Contains no mechanical parts that can fail.
- There are no time-change components to replace.
- No flight tests are required after installation.
- No special tooling is needed to remove and install the parts.
- Aircraft can be modified or de-modified without any structural changes.
